Reseller Tip:
Low cost, easy & simple to use! Retailers can install multiple platforms according to system requirements and expect the same outstanding results.

WebPRNT

Connecting your Star Desktop & Mobile printers to the Web wherever you are!

star webPRNT

Given their recent success in the mobile market, Star realises there is a growing requirement to print from both mobile and desktop applications to receipt printers. Star’s platform-agnostic WebPRNT solution is designed to generate print data via a web browser to output directly to any Star printer fitted with a WebPRNT interface or using Star’s WebPRNT Browser available from GooglePlay or the App Store.

Offering either a low cost Plug-In” interface or Star WebPRNT Browser solution, Star WebPRNT removes the issues usually associated with web-based printing by offering driverless printing capabilities for all receipt data, utilising HTML and JavaScript standards to provide consistent browser printing. Star WebPRNT supports all standard receipt requirements including logos, barcodes etc. The **WebPRNT.com** site fully demonstrates WebPRNT’s capability and is a useful tool for resellers as well as developers working with Star’s extensive range of thermal POS printers.

Star WebPRNT “Plug-In” Interface

- Simple Installation – easy “plug-in” interface user installable
- BYOD (Bring Your Own Device) compatible
 - Printing from customers’ mobiles, tablets, etc with zero software installation
 - Printing consistent receipts from any web browser with zero platform dependent code

Star WebPRNT Browser

Simplifies direct printing from the Web to Star’s huge range of low cost ticket/label/kitchen/mobile Bluetooth printers. As well as supporting all relevant web technologies. Full screen user interface mode available for OEM/kiosk use. Download from GooglePlay or App Store

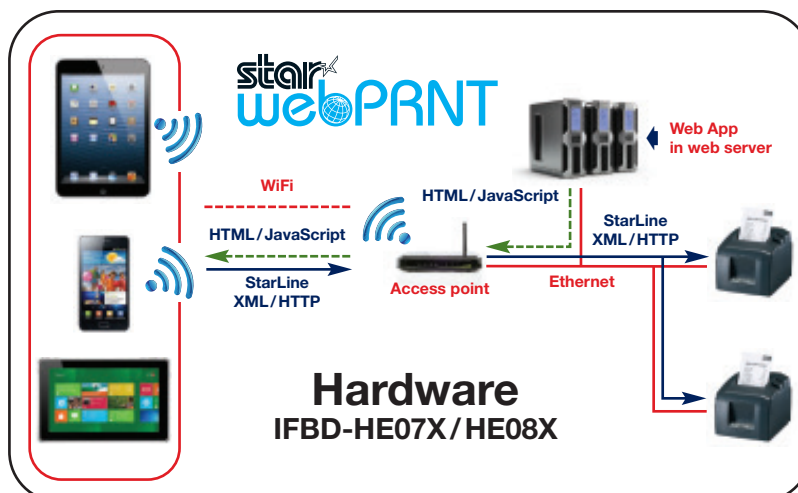

WebPRNT SDKs including a demonstration page are available from Star’s global support site www.starmicronics.co.th

The really clever part is that a Star WebPRNT printer does not need a local server and is not PC dependent. You just need to share the network with your web enabled device.

Using Star WebPRNT technology a single web-based application can be accessed by the browser on multiple platforms including Windows, Linux, Android, iOS, Mac OS, Blackberry and Symbian yielding identical print output.

► **Star WiFi Power Pack compatible for true wireless Web based printing**
